

Food Blog

I have created my website from scratch and have used the framework Bootstrap.

I have published it on github.

The website contains two different pages, the index and desserts.

It contains a carouse image, and all images are created using lightbox so when you click on them it will be displayed on full screen.

The site is responsive, the navigation bar from left goes on a hamburger menu when the screen is small. I have added a form in the end, which send an email. When you click on the send button it opens the mail application on your computer and have already set the mail, the object and the message in case you have filled the form.

I have added also a top button which is showed when you scroll down and takes you on the top of the page.

The codes also validate and is accessible:

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for <https://fatjonaismailaj.github.io/Fatjona-sFoodBlog/Portfolio/Desserts.html>

Checker Input

Show ☐ source ☐ outline ☐ image report

Check by

<https://fatjonaismailaj.github.io/Fatjona-sFoodBlog/Portfolio/Desserts.html>

Document checking completed. No errors or warnings to show.

Used the HTML parser. Externally specified character encoding was utf-8.

Total execution time 90 milliseconds.

[About this checker](#) • [Report an issue](#) • Version: 21.4.12
